

Netflix EDA Dashboard

Project Overview

The Netflix EDA Dashboard is an interactive data analysis application built using Streamlit. This project explores the Netflix dataset to uncover insights about content distribution, missing values, content types, and country-wise trends.

The dashboard allows users to navigate through different analyses using a sidebar and visualize key findings through tables and charts.

Technologies Used

- Python
 - Pandas
 - NumPy
 - Matplotlib
 - Streamlit
-

Features

Dataset Overview

- Total number of rows and columns
- Basic dataset information

Missing Values Analysis

- Identify missing values across columns
- Understand data quality issues

Movies vs TV Shows Analysis

- Compare the distribution of Movies and TV Shows
- Visualize content type counts

Country-wise Content Analysis

- Identify the top 10 countries with the most Netflix content
- Compare Movies and TV Shows across countries

Interactive Sidebar Navigation

- Easily switch between different analyses
 - User-friendly dashboard experience
-

Dashboard Screenshot

Add your dashboard screenshot here after uploading it to the repository.

Example:

Dashboard Screenshot

How to Run

Clone the Repository

```
git clone https://github.com/YOUR_USERNAME/netflix-eda-dashboard.git
```

Navigate to the Project Folder

```
cd netflix-eda-dashboard
```

Install Required Libraries

```
pip install pandas numpy matplotlib streamlit
```

Run the Dashboard

```
streamlit run app.py
```

Learning Outcomes

Through this project, I learned:

- Exploratory Data Analysis (EDA)
- Data cleaning and missing value analysis

- Data visualization using Matplotlib
 - Building interactive dashboards with Streamlit
 - Git and GitHub project management
